Archiware Showcases Partner Integrations with P5 Version 7.2 at NAB 2024

Archiware GmbH, expert in data management software, showcases numerous partner integrations at its NAB Show booth SL6037. Live demonstrations of solutions with Archiware P5 version 7.2 include ATTO, DataIntell, MagStor, QNAP, Sonnet, SYMPLY, and UNITEX.

Munich, April 2nd, 2024 – Archiware's P5 Archive, P5 Backup, and P5 Synchronize modules are streamlined through integrations with a plethora of hardware and software partners that are featured at NAB Show 2024. Hosted at the Archiware booth, DataIntell's state-of-the-art storage analytics software ensures unparalleled transparency by identifying redundant data for archiving via P5 Archive. This allows users to take control and optimize costs in the long-term.

Setups with tape library vendors enable data to be managed effortlessly from a workstation-class machine, enhancing accessibility and ease of operation. Archive to LTO tape using P5 Archive is demonstrated utilizing the SymplyPRO Thunderbolt LTO drive, seamlessly integrated with a Mac. For an intuitive, robust, and scalable solution, MagStor's SAS LTO drive is connected to a Mac running Archiware P5 via the ATTO SAS to 10GB Ethernet Bridge and the Sonnet Thunderbolt to 10GB Ethernet.

A practical solution combining LTO tape and NAS is exhibited through the integration with QNAP and UNITEX. With a maximum read and write speed of up to 300MB/s, the tape drive by UNITEX allows for a flexible integration with QNAP NAS and Archiware P5 through its dual SAS and USB interface. Beyond efficiency and speed in acquiring and sharing data, this setup offers a comprehensive and future-proof is data management strategy.

A complete list of Archiware's 33 hardware and software partners at the show is available in the **NAB Partner Map**: **bit.ly/nab-partners-2024**

About Archiware:
Thousands of media companies worldwide use Archiware P5 to protect their production and assets. The product line includes:

- **P5 Synchronize**: for replication of time-critical data, to ensure high availability.
- **P5 Backup**: to back up server data to disk, tape, and cloud.
- **P5 Archive**: with MAM-like features, migrating data offline to tape and cloud.
- **P5 Data Mover**: an extension for the P5 Archive module for policy-based moving, copying and tiering of archived data between tape, disk and cloud.

All modules can be combined to create multiple-step security concepts to achieve maximum data protection. Archiware P5 secures data to disk, tape, and cloud and has integrations with numerous MAM/DAM/PAM and storage partners. Headquartered in Munich, Germany, Archiware GmbH is a privately held company with over 22 years of experience in data management software and more than 18,000 licenses sold worldwide.
